

MGIC/eMagic has Cybertrust Certification

Increasingly recognized as the de-facto standard for e-business, Cybertrust Certification is your assurance that an organization has widely-recognized and accepted measures in place to secure its environment and can confidently conduct business in a world of ever-changing risk. Cybertrust Corporation is a worldwide leader in managed security and assurance solutions for Internet-connected organizations.

MGIC has had its security controls, procedures and policies examined, measured and validated by Cybertrust® Corporation. Cybertrust Certified Customers have made security a priority in order to safeguard their users' information and assets. The Cybertrust Certified Seal demonstrates that this organization employs proven security processes and technologies in order to maintain a proactive and comprehensive information security program.
