

Mortgage Guaranty Insurance Company has achieved Verizon Cybertrust Security Certification

This Verizon Cybertrust Security Certified organization has had its security controls, procedures and policies examined, measured and validated by [Verizon Business](#), a global leader in IT, security, and communications.

The Verizon Business Security Management Program is a comprehensive and ongoing risk reduction program that addresses all aspects of proactive information security. More than a seal of approval, a Verizon Cybertrust Security Certified status demonstrates to the public that this organization has made safeguarding user information a critical priority. The Verizon Cybertrust Security Certified seal also demonstrates that this organization employs proven security processes and technologies to maintain a proactive and comprehensive information security program.
